

## CSCI 3350 Assignment 5

### Fireworks

**Estimated time:** 10 hours

**Objective:** This assignment has you work with creative web design and the basic features of Adobe Fireworks. You will design and build your personal website mock-up.

**Instructions:**

- For creative web design, you should first produce sketches and design a mock-up in Fireworks, before building the website in Dreamweaver.
- This is **your personal website**. You should use it to introduce yourself (or your work, or your hobbies etc) to others. You can use it to advertise yourself (your work etc), but it should NOT become a technology site or a political site or a religious site etc.
- Produce two sketches for your personal website, choose one of them for the final Fireworks work.
- Apply basic design principles you learnt in this class.
- Choose a color scheme.
- Apply suitable “texture”.
- The width of your webpage should be around 960 px, a bit more or a bit less is alright.
- Build your personal website design mock-up in Fireworks. Name your file index.fw.png.
- You do NOT need to slice the image.
- Submit the following
  - **index.fw.png** to the D2L digital dropbox
  - Two sketches (in class)
- Hints
  - Be creative but...
  - Keep it simple, you only have 10 hours

**Grading guidelines (programming questions):**

Your programs will be judged on several criteria, which are shown below.

- Correctness (50%): correct techniques, following instructions above
- Design/Idea (30%): following design principles
- Presentation (20%)
