# CSC 230 Class Information and Syllabus

COURSE NUMBER: CSC 230

COURSE TITLE: Elementary Data Structures and Algorithms

CREDITS: 3:3

PREREQUISITES: Grade of at least C (2.0) in CSC 130 or transfer credit for CSC 130

INSTRUCTOR: Name: Leong Lee

Office: Petty 155

Office Hours: Mon/Wed 5pm-6pm, Tue/Thur 9am-10am, or by appointment

Phone: 336-334-9724 E-mail: 1\_lee2@uncg.edu

CLASS WEB SITE: Please refer to blackboard.

CATALOG DESCRIPTION: Advanced syntax of high level language taught in CSC130. Emphasis on modularization and abstraction. Big-O analysis of algorithms. Design and use of abstract data types with various implementations.

### TENTATIVE TOPICAL OUTLINE:

- 1. Array list class
- 2. A Second Look at Classes and Objects
- 3. Text Processing and More about Wrapper Classes
- 4. Inheritance
- 5. Recursion
- 6. Sorting, Searching, and Algorithm Analysis
- 7. Generics
- 8. Collections
- 9. Array-based lists
- 10. Linked Lists
- 11. Stacks and Queues

TEACHING METHODS AND ASSIGNMENTS FOR ACHIEVING LEARNING OUTCOMES: Class will meet twice a week for 75 minutes. Class time will include brief overviews of the material, but students are

expected to have completed the textbook readings before class so that the majority of class time can be used for discussing the material, answering questions and clarifying topics from the book, and working through examples. If students do not keep up with readings, the instructor may give in-class quizzes or small reading-summary assignments as extra motivation.

Assignments / Projects: Assignments (projects) will be both written and programming. The instructor will not make any adjustments to a student's code when grading, so if any submitted program does not compile the student will get a zero on the "correctness" portion of the grade (or 50 points off the overall grade), with no exceptions --- more information on grading criteria will be distributed and discussed before the first assignment. Program source code will be turned in electronically, and students are expected to turn in a printout in class or to the instructor.

Excused Absences for Religious Observances: The university allows for a limited number of excused absences for religious observances --- students who plan to take such an absence should notify the instructor at least two weeks in advance so that accommodations can be made (also see the late work policy at the later part of this syllabus).

Late Policy and Makeup Exams: Assignments (projects) are due at the beginning of class on the due date, and may be turned in up to 7 calendars days late with a 25% late penalty. No assignment will be accepted more than 7 calendar days after the original due date! If the instructor adds assignments to ensure that students keep up with reading assignments, these will not be accepted late for any reason. Students with planned absences, whether for university events, religious observance, or other reason, are expected to make arrangements with the instructor to turn in assignments or take exams before the scheduled date of the assignment or test.

Exam/test dates are on the schedule on the following page — if there are any changes, they will be announced at least two weeks in advance if possible. A missed exam may be made up only if it was missed due to an extreme emergency and arrangements are made before the exam date. Exams may not be taken early or late due to personal travel plans.

EVALUATION AND GRADING: Each student activity will contribute to the final grade in the class according to the following percentages.

| Assignments                     | 40% |
|---------------------------------|-----|
| Mid-semester exams (17.5% each) | 35% |
| Final exam                      | 25% |

### REQUIRED TEXTS/READING/REFERENCES:

T. Gaddis, and G. Muganda, Starting Out with Java: From Control Structures through Data Structures, First Edition, Addison Wesley, 2006. ISBN: 978-0321421029.

### TOPICAL OUTLINE/CALENDAR:

| Week /<br>Date | Topic  | Reading | Remarks / Due / Exam          |
|----------------|--|---------|-------------------------------|
| 1              | Arrays and the ArrayList Class   | Ch. 8   |                               |
| 1/10,          |  |         |                               |
| Mon            |  |         |                               |
| 2              | Arrays and the ArrayList Class   | Ch. 8   | 1/17, Mon: Dr. Martin Luther  |
| 1/17           | Related Algorithms   |         | King Jr. Holiday              |
| 3              | Arrays and the ArrayList Class   | Ch. 8   |                               |
| 1/24           | Related Algorithms   | GI O    |                               |
| <b>4</b> 1/31  | A Second Look at Classes and Objects   | Ch. 9   |                               |
| 5              | A Second Look at Classes and Objects   | Ch. 9   |                               |
| 2/7            | A Second Look at Classes and Objects   | CII. 9  |                               |
| 6              | Text Processing and More about Wrapper Classes   | Ch. 10  |                               |
| 2/14           | Problem Solving and Algorithms   |         |                               |
| 7              | Text Processing and More about Wrapper Classes   | Ch. 10  | Note: Exam I                  |
| 2/21           | Problem Solving and Algorithms   |         |                               |
| 8              | Inheritance  | Ch. 11  | 3/5 Sat: Instruction ends for |
| 2/28           | Problem Solving and Algorithms   |         | Spring Break 1pm              |
| 9              |  |         | Spring Break                  |
| 3/7            |  | G! 11   | 2/14 2 5                      |
| 10             | Inheritance  | Ch. 11  | 3/14, Mon: Classes resume     |
| 3/14           | Problem Solving and Algorithms   | Cl. 15  | after Spring Break 8am        |
| <b>11</b> 3/21 | Recursion  | Ch. 15  |                               |
| 12             | Related Algorithms Sorting, Searching and Algorithm Analysis   | Ch. 16  | Note: Exam II                 |
| 3/28           | Sorting, Searching and Argorithm Analysis  | Cii. 10 | Note. Exam II                 |
| 13             | Sorting, Searching and Algorithm Analysis  | Ch. 16  |                               |

| 4/25           |  |         | Schedule; last day of classes |
| 16, 17         | Final Exam - Tuesday, May 3, 7:00–10:00 P.M.   |         | 4/28-30, 5/2-4: Final Exams   |
| Exam           |  |         | Note: Final Exam              |

ACADEMIC INTEGRITY POLICY: Students are required to sign the Academic Integrity Pledge on any work they do. The pledge is the statement "I have abided by the UNCG Academic Integrity Policy on this assignment." For information on the UNCG Academic Integrity Policy, see http://academicintegrity.uncg.edu/.

Assignments (projects) in this class are for individual work, unless explicitly stated otherwise. General concepts and material covered in the class may be discussed with other students or in study groups, but specific assignments should not be discussed and any submitted work should be done entirely your own. The

instructor uses a program comparison system that compares submissions and highlights programs that are too similar in order to detect cheating.

It is expected that the class textbook will be used as a reference, but if any other reference materials (including web sites) are used in preparing homework solutions they should be clearly cited. Any incidents of academic dishonesty will be handled strictly, resulting in either a zero on the assignment or an F in the class, depending on the severity of the incident, and incidents will be reported to the appropriate UNCG office.

ATTENDANCE POLICY: Attendance will not be taken in class, and is voluntary; however, all students are responsible for everything done or said in class (this can include changes in assignments, due dates, etc.). It is the student's responsibility to obtain notes from another student if they miss class — the instructor will not provide notes.

## ADDITIONAL REQUIREMENTS:

Laptop/Cellphone Policy: Laptops can be both a benefit and a distraction in a classroom. While many students benefit from taking notes using a laptop, or having access to outside class-related resources during class, other students cannot resist the temptation of checking e-mail, chatting, or even playing games during class time. This class has a strict "no non-class related use" rule for laptops — if you are found violating this policy, then your in-class laptop privileges will be taken away. Cellphones are a distraction for everyone, and should be turned off during class. If there is a special situation where you need to have your phone on for a particular day, please let the instructor know the situation before class.

ADA STATEMENT: UNCG seeks to comply fully with the Americans with Disabilities Act (ADA). Students requesting accommodations based on a disability must be registered with the Office of Disability Services located in 215 Elliott University Center: (336) 334–5440.

UNIVERSITY CLOSINGS: If university facilities are closed due to flu outbreak or other emergencies, it does not mean that classes are cancelled. In such an event, please check the class web page and Blackboard site for information about if and how the class will proceed.
